A LITTLE BIT ABOUT US

Universal Damp Solutions is a leading provider of damp control and moisture management solutions based in Buckinghamshire and serving the Home Counties and London.

With a strong commitment to delivering excellence, we specialise in addressing damp and moisture-related issues in residential and commercial properties. Our experienced team is dedicated to providing effective and long-lasting solutions to protect and enhance the integrity of your property.

In addition to our damp services, we also provide wall insulation, painting, plastering, and thermal rendering.

SERVICES WE PROVIDE

At The Universal Group our versatility is your advantage. We have the capability to work on a diverse range of properties, including commercial, industrial, and residential. No matter the size of the project, we bring the same level of dedication, expertise, and care to ensure exceptional results.

DAMP SURVEYS

Comprehensive assessments to identify and evaluate the extent of damp issues in your property.

MOISTURE CONTROL

Managing and regulating indoor humidity levels to prevent condensation and damp problems.

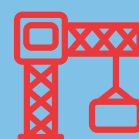

DAMP PROOFING

Implementing effective measures to prevent moisture ingress and damage to your building's structure.

BASEMENT TANKING

Ensuring basements remain dry and free from water infiltration through waterproofing solutions.

PENETRATING WALLS

Identifying and addressing issues causing water ingress through walls or roofs.

MOULD REMEDIATION

Safely and thoroughly removing mold growth, improving indoor air quality and preventing further infestations.

THERMAL ENERGY SAVING OPTIONS

Interior graphite paint

This specialised paint contains microscopic graphene particles that enhance its thermal conductivity properties, helping to regulate indoor temperatures and reduce energy consumption

Spray cork coatings

Spray cork coatings are cutting-edge and eco-friendly solutions used to protect and insulate various surfaces. They offer excellent thermal and acoustic insulation properties, weather resistance, and durability.

Exterior Thermal paints

Exterior thermal textured resin paints are advanced coatings designed to enhance a building's energy efficiency and weather resistance.

Intumescent paints

When exposed to high temperatures, these paints expand and form a thick, insulating layer, effectively delaying the spread of fire.

THE SURVEY AND IT'S ROLE

WHY THE SURVEY?

- **Identifying Underlying Issues:** Pinpoints any existing damp or moisture-related issues within the property.
- **Determining the Scope of Work:** Assesses the extent of the problem to tailor solutions effectively.
- **Preserving Structural Integrity:** Prevents potential structural damage caused by dampness.
- **Ensuring Effective Solutions:** Recommends targeted remedies based on accurate diagnosis.
- **Avoiding Costly Repairs:** Proactively addressing damp issues mitigates the risk of extensive and expensive repairs in the future.

IS IT GUARANTEED?

THE BOTTOM LINE

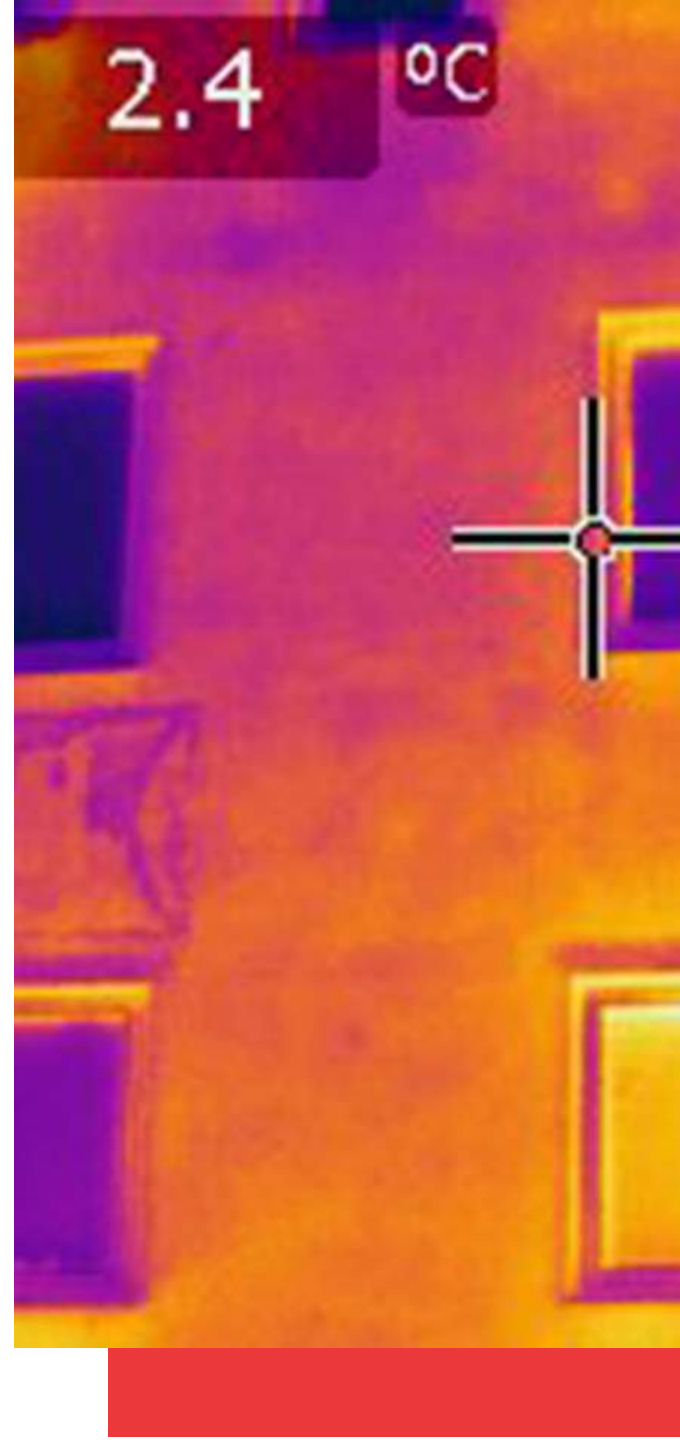

One of the key aspects that sets us apart is our guarantee on the works completed. We offer a robust guarantee, with a 20-year warranty from the manufacturer and a 10-year warranty from the installer themselves. This dual warranty provides comprehensive coverage, protecting you against any potential issues that may arise in the future. Even in the unlikely event of the installer's closure, you can rest assured that your investment is protected.

By addressing damp issues proactively and offering a comprehensive guarantee, we help you avoid costly repairs down the line. Investing in our services not only resolves immediate concerns but also provides peace of mind for years to come.

WHICH SURVEY IS RIGHT FOR ME?

A basic damp survey, costing **£150 Inc VAT**, provides homeowners with a comprehensive assessment of damp-related issues within their property. It includes identification of causes, proposed solutions, and a detailed quote for necessary remedial actions.

On the other hand, a thermal imaging survey, priced at **£260 Inc VAT**, offers additional benefits compared to a standard damp survey.

A thermal imaging survey offers numerous benefits over a standard damp survey, including enhanced detection capabilities, non-invasiveness, comprehensive analysis, efficiency, and proactive maintenance. With the aid of thermal imaging technology, homeowners can make informed decisions to address damp-related issues effectively and maintain the long-term health and condition of their property.

THE THERMAL IMAGING SURVEY

WHAT'S IN THE BOX?

1. **Enhanced Detection:** Thermal imaging technology allows for the detection of moisture and dampness that may not be visible to the naked eye or traditional survey methods. This enables more accurate identification of damp-related issues, even in hidden or hard-to-reach areas.
2. **Non-Invasive:** Unlike invasive methods that may require drilling or removal of wall coverings, thermal imaging is non-invasive. It provides detailed insights into potential damp problems without causing damage to the property.
3. **Comprehensive Analysis:** Thermal imaging surveys provide a comprehensive analysis of the building's thermal performance. They can identify areas of heat loss, moisture ingress, and insulation deficiencies, offering homeowners a holistic understanding of their property's condition.
4. **Time and Cost Efficiency:** Thermal imaging surveys are often quicker and more cost-effective than traditional damp surveys. They require less time for assessment and provide immediate visual results, allowing for swift decision-making and prioritization of remedial actions.
5. **Preventative Maintenance:** By detecting moisture issues at an early stage, thermal imaging surveys enable homeowners to address problems before they escalate into costly repairs. This proactive approach helps prevent structural damage and mold growth, ultimately preserving the integrity and value of the property.

THE PRICING ADVANTAGE

Our commitment to pricing ensures that you receive competitive quotes.

If you've already had a survey and several quotes we are happy to try beat your best quote and potentially save you thousands. Just reach out, send us a copy of your survey and quotes and let us do the rest.
